UN Rated Square Fiber Drum

DRM1071 Storage Capacity 55 gal.,UN1G/X100/S,Thickness .180"

A 55-gallon square drum can be placed closer together than round drums, providing more efficient storage of dry or solid materials.

- Single-wall construction is sturdy and long lasting; rounded corners are less likely to get damaged
- Telescoping, two-piece design allows compact storage; flat top and bottom make stacking safer and more uniform
- Drums contain no metal parts for rust-free storage and complete incineration at time of disposal
- Cost-effective alternative to poly drums for storing dry or solid materials
