

PIG® Aerosol Can Recycler

DRM1266 Aerosol Can Recycler, For 5" H to 9.5" H Cans, 1 each

Puncture your aerosol cans for easy, legal recycling to avoid the hassle, regulation and expense of hazardous waste handling.

- Recycling system easily punctures aerosol cans, rendering them exempt from hazardous waste regulations when properly emptied
- Eliminates the risks associated with illegal aerosol disposal and the expense of haz waste handling
- Minimizes worker injuries caused by fire, explosion or VOC release from improperly emptied or unemptied cans
- System works with domed mini, standard and jumbo aerosol cans (minimum 2" diameter x 5" H; maximum 3" diameter x 9.5" H with sleeve removed)
- Two-piece coalescing filter/carbon cartridge captures odors and potentially harmful VOCs released by punctured aerosol cans
- Timestrip indicator eliminates the guesswork of carbon cartridge changeouts
- Coalescing filter life is 6 months; carbon cartridge life is 3 months
- Angled hardened steel pin punctures cans cleanly without leaving jagged edges
- Unit mounts directly into 2" bung on a 30- or 55-gallon closed-head steel drum; residual liquids drain directly into drum
- Included ground wire helps prevent static electricity buildup
- Selling scrap steel can help you meet waste minimization goals at your facility
- The drum should not be filled more than 70% full to provide proper displacement for released contents
- NOTE: Always operate system outdoors or in a well-ventilated area
