

PIG® Aerosol Four-Can Recycler

DRM4000 For 5" H to 9.5" H Cans, 1 each

Puncture four aerosol cans at once for easy, legal recycling without worrying about hazardous waste disposal. The only four-can recycler on the market!

- Save time emptying aerosol cans for recycling with a system that can puncture four aerosol cans at once
- Puncturing and draining aerosol cans turns hazardous waste that's expensive to dispose of into non-hazardous waste that can be recycled as scrap metal
- Eliminates the risks associated with illegal aerosol disposal and the expense of haz waste handling
- Minimizes worker injuries caused by fire, explosion or VOC release from improperly emptied or unemptied cans
- Recycling unit mounts directly into 2" bung on a 55-gallon closed-head steel drum; residual liquids drain directly into drum
- Adjustable threaded support plungers make it easy to safely puncture 2-3" diameter cans — cans that are under 7" in height will require support plungers; cans that are over 7" will require support plungers to be removed (see resources & downloads for assembly instructions)
- Combination coalescing/carbon filter captures odors and potentially harmful VOCs released by punctured aerosol cans
- Timestrip indicator eliminates the guesswork of filter changeouts
- Combination coalescing/carbon filter life is three months
- Angled hardened steel pins puncture cans cleanly without leaving jagged edges
- Included ground wire helps prevent static electricity buildup
- Selling scrap steel can help you meet waste minimization goals at your facility
- The drum should not be filled more than 70% full to provide proper displacement for released contents
- NOTE: Always operate system outdoors or in a well-ventilated area; do not puncture full can if drum is more than 50% full
- NOTE: This item does **not** ship to California.

Specifications

Use With	5" H to 9.5" H Cans
Brand	PIG
Category	Aerosol Can Recycler
Coating	No
Lockable	No
Vapor Minimization Disk	Not Required
Color	Black/White
Sold as	1 each
Weight	45.2 lbs.
# per Pallet	18
Composition	Body: Aluminum Alloy A380 Pins: Hardened Steel Gaskets: Neoprene
Includes	1 - Puncture Unit 1 - 12" x 18" Instruction Sign 1 - 5' Long Grounding Wire (DRM1235) 1 - Goggles (GLS290-AF) 2 - PIG® Combination Coalescing/Carbon Filter (DRM1265)
UNSPSC	76121502
Pigalog® Page Number	Page 256

Metric Equivalent

Weight	20.5 kg
