

PIG® TuffGrit™ Diamond Plate Anti-Fatigue Mat

FLM8501 Dry Applications, Cushion: Vinyl & PVC Foam/Top Coat: Aluminum Oxide and Proprietary Sealant, 2' W x 3' L

Grit so tough it lasts 11X longer! The TuffGrit™ surface on our Diamond Plate Anti-Fatigue Mat easily outlasts the competition, providing long-lasting traction in slippery environments.

- Proprietary TuffGrit™ coating is incredibly durable and abrasion resistant; lasts up to eleven times longer than the leading competitor's grit coating in dry environments, and up to seven times longer under oily conditions
- Exceeds ANSI standards for high slip resistance, providing extreme traction even in wet areas or applications with light overspray or oily drips (not for use in standing water/oil)
- Engineered to leave no grit behind; safer than other mats that gradually lose their grit -- and their effectiveness -- over time
- Raised diamond plate texture adds a second level of slip resistance in addition to TuffGrit™ coating
- More than a half inch of PVC foam relieves stress on knees, feet, ankles and back from extended standing
- Reinforced industrial grade construction is built to last in heavy-duty applications
- Built-in beveled edges create a safe transition on and off mat
