

## PIG® Outdoor Oily Water Filter Bucket

FLT730 For Oil, Each absorbs up to 5 gal., Max Flow Rate 1 gal./Minute

Self-contained unit connects to a Leak Diverter to trap oils and help you comply with SPCC and stormwater regulations.

- Oil-only absorbents packed into bucket soak up hydrocarbons but repel water, which passes over the absorbents and flows through the bucket to the lower drainage point
- Seven alternating layers of Oil-Only Mat Pads and Oil-Only Pillows offer high oil retention for fewer changeouts
- Hose fitting on top of container lid accepts 3/4" drainage hose from a Leak Diverter or other liquid sources; bucket can be located almost anywhere
- Container and absorbents are both UV resistant for long-term outdoor use without degradation
- 3/4" connection on bottom of container accepts a drain plug (included), drainage hose (also included) or can be used as a free-flowing drain
- 20-gallon container holds oil-absorbent media to remove up to 5 gallons of oil, grease and hydrocarbons without taking in a drop of water
