

PIG® Hydrofluoric Acid Neutralizer

GEN864 Absorbs Neutralizes Hydrofluoric Acid, Neutralizing Capacity Up to 4 gal.

Converts spilled acids into calcium fluoride and inorganic salts for safer cleanup.

- Liquid changes from beige to red during neutralization, then returns to normal when neutralization is complete; helps identify the best time to handle with the least amount of risk
- Safer to use than caustic soda neutralizers which can form a poisonous gas by-product
- Liquid formula works at an efficient 1:1 ratio, generating less gas and heat than traditional powder neutralizers; safer to use and requires less product per spill
- More versatile than powder-based neutralizers; liquid can be sprayed on vertical or perforated surfaces, even atomized to help minimize vapors
- Use 1:1 ratio for neutralization up to 47% concentration of hydrofluoric acid
- opened shelf life, if sealed properly, of 1 year

Specifications

Brand	PIG
Fluid Absorbed	Neutralizes Hydrofluoric Acid
Neutralizing Capacity	Up to 4 gal.
Unit Weight	1 gal.
Sold as	4 containers per box
Weight	41 lbs.
# per Pallet	60
Composition	Proprietary Ingredients
Shelf Life	3 years
UNSPSC	76121903
Pigalog® Page Number	Page 70

Metric Equivalent

Weight	18.6 kg
--------	---------

Technical Information

CountryShipOnly

This product can ONLY be shipped to: United States, Australia, Canada, Israel.
