

PIG® Hand Sanitizing Station Sign & Marker - Bag of 10

GMM99002 Reminds And Reinforces The Proper Use Of Hand Sanitizer Stations, Stays in Place; Won't Damage Floors, Peel or Curl Up; Anti-Slip, Includes (10) 9" x 9" Peel & Stick Markers

Clearly designate hand sanitizing stations throughout your facility to stay in compliance with health guidelines. Adhesive-backed markers are easy to install, stay down and won't leave residue or damage surfaces upon removal.

- Promotes usage of hand sanitization stations and dispensers for employees and guests; apply to tabletops or counters to define areas and catch drips from bottles or jugs of hand sanitizer; also ideal for use as a floor sign in front of floor stand dispenser stations
- Creates a safe environment for employees and guests and helps companies communicate social distancing guidelines
- Nonpermanent adhesive sticks to clean, dry surfaces with a super-tight grip, but peels up easily without causing damage or leaving a residue
- Unlike vinyl decals or tapes, our adhesive-backing has been proven in years of commercial and retail use to withstand full foot traffic, scrubbing and disinfectant use
- Anti-slip sign absorbs moisture and, when used on floors, won't become slippery when wet like decals, tapes or paints can
- Traps any liquid to keep it contained and from creating a mess on tabletops or a slip and fall hazard on floors
- When used on floors, adhesive-backed sign can be cleaned with a mop, vacuum or floor scrubber without budging; low profile does not create issues for foot traffic, wheelchairs or walkers; ADA compliant
- Durable, high-contrast message will not wear off; blank area at top of marker allows you to place bottles or jugs of sanitizer on sign without covering message
- Sticks to tabletops, counters and most commercial floor surfaces including smooth indoor concrete, vinyl, linoleum, ceramic tile, quarry tile and laminate flooring
- Apply pressure to surface when installing sign to ensure strong grip

- Recommended for indoor and non-carpeted surfaces only
