

PIG® HazMat Chemical Absorbent Dike

HA1010 5" x 10', Absorbs up to 9 gal. per sock, 2 socks

Contain and absorb higher-volume spills of concentrated chemicals including acids, bases or other corrosives.

- Absorbs acids, bases, corrosives, chemicals and unknown liquids, even those with high concentrations like 98% sulfuric acid and 30% sodium hydroxide
- Chemical-resistant dike won't degrade or cause a dangerous reaction upon contact with corrosive spills
- Excellent for quickly diking and stopping the spread of larger chemical spills; for diking smaller chemical spills, consider our smaller diameter PIG HazMat Socks
- Polypropylene skin resists chemicals and tearing; reduces dust and holds in liquid, even when saturated
- Polypropylene filler is highly absorbent for containing corrosive or reactive spills
- Pink color is easily distinguishable to assure workers use the correct dike during a spill emergency
- Can be incinerated after use to reduce waste
