

## PIG® Super Absorbent Sock

PIG210 3.25" x 42", Absorbs up to 1 gal. per sock, 24 socks

Control high-volume machine leaks with our most absorbent general-purpose sock.

- Extra-thirsty, formable socks hug corners and walls, surround higher-volume machine leaks and contain spills to keep workers safe
- Cellulose filler is highly absorbent for big leaks and spills; super absorbency means that you replace them less often
- Stitch-bonded, polypropylene skin resists bursting; reduces dust and holds in liquid, even when saturated
- Absorbs most common industrial liquids - oils, water, solvents, coolants and more; not recommended for acids, bases or other corrosive liquids
- 85% recycled cellulose filler is ideal when green products are desired
- Wringable for reclaiming up to 65% of absorbed liquid
- Can be incinerated after use to reduce waste or for fuels blending
- Nobody knows more about socks than New Pig - we invented them!
