

Premium Metal-Guard® Poly Sheeting

PKG605 36" W x 500' L, Protect Metal from Rust, Long Term Corrosion Inhibitor

Protect parts made with a range of metals from rust and corrosion during manufacture, storage and shipping by wrapping them in this heat-sealable poly sheeting with VCI (Volatile Corrosion Inhibitor) blended thoroughly through film.

- Premium Metal-Guard poly sheeting is a safe, effective corrosion inhibitor packaging film designed to protect a range of metals from rust and corrosion during manufacture, storage and shipping
- Parts wrapped in this VCI poly sheeting remain clean, dry and ready to use immediately
- Long-term corrosion-protection film for multi-metal, brass, copper, bronze, iron and steel, nickel, tin and zinc and zinc galvanized
- Heat sealable, low-density polyethylene film has a proprietary blend of VCI blended throughout the film rather than superficially added
- Strong, versatile and easy to use
- Transparent for visibility to wrapped contents
- Blue shade for easier identification to prevent misuse or waste of the higher-quality supply
- Recyclable
