

PIG® High-Volume SpillBlocker® Dike

PLR253 Ideal For Quick Spill Response, One 4" W x 5' L x 4.5" H Section

Our tallest SpillBlocker dikes are designed to handle high-volume spills and pooling liquids.

- Only PIG dikes offer a tear-resistant top layer and a flexible, tacky bottom layer to create a tight, liquid-proof seal on smooth surfaces
- Taller height is great for containing deeper pools of liquid and high-volume spills
- Reusable dike cleans easily with soap and water
- Built-in dovetail connectors create a liquid-proof seal and allow you to join as many sections as you need without extra parts
- Fast protection for when a large spill is heading right for your drain
- Confines and diverts fluids without absorbing them, making cleanup simple
- High-visibility lime-green color draws attention to spill for increased safety
- Polyurethane material resists water, oils and many chemicals
