

PIG® SpillBlocker® Dike

PLR267 Ideal For Quick Spill Response, Two 3.5" W x 5' L x 3" H Sections

Quickly deploy these easy-to-handle spill dikes to contain liquids up to 3" deep. Built-in connectors let you join multiple sections.

- Only PIG dikes offer a tear-resistant top layer and a flexible, tacky bottom layer to create a tight, liquid-proof seal on smooth surfaces
- 3" height is great for containing deeper pools of liquid, larger flows or for larger volume spills
- Reusable dikes clean easily with soap and water
- Built-in dovetail connectors create a liquid-proof seal and allow you to join as many sections as you need without extra parts
- Fast protection for when a spill is heading right for your drain; just place dike in front of spill to contain liquid
- Confines and diverts fluids without absorbing them, making cleanup simple
- Polyurethane material resists water, oil and many chemicals
- Two smaller 5' sections are easy to handle and deploy
