

PIG® Drive-Over Build-A-Berm® Barrier Straight Section

PLR283 Ideal For Long-Term Custom Containment, High-Traffic Areas, 5.5" W x 12' L x 2" H, 1 each

Drive-over barrier springs back into shape when heavy vehicles pass. Custom containment berm helps you control liquids in high-traffic areas.

- The Drive-Over Barrier provides semi-permanent containment in high-traffic areas on concrete, asphalt or most sealed surfaces
- Constructed of 40-ounce, vinyl-coated fabric with an open-cell foam core; berm compresses to approximately 1/4" when driven over; springs back to shape when vehicles pass
- Durable enough to withstand indoor or outdoor traffic from trucks, loaded tow motors and other heavy vehicles with sufficient ground clearance
- Secure to floor with sealant (not included) and reinforce with predrilled aluminum mounting strips (included) and steel anchors (included); seal seams with vinyl cement (not included)
- Combine with Build-A-Berm Barrier Vented Corners to create liquid-proof containment; ends overlap and seams can be sealed together with Industrial-Strength Vinyl Cement (sold separately)
- When used with standard high-visibility yellow Build-A-Berm Barriers, orange color indicates area where drivers can enter and exit
- Sealant, industrial-strength vinyl cement and barrier vented corner pieces sold separately
