

PIG™ Portable Adjustable Clear Barrier & Sneeze Guard

PLS2028 Replaceable Film; Compact; Portable & Easy Setup, Adjustable from 6' W to 9.75' W & 3.5' H to 7.5' H, Choose 3' H x 100' L or 4' H x 100' L Barrier Film Roll

Portable barrier promotes social distancing for protection against the spread of germs and physical contact in open areas; low cost, quick assembly, adjustable and no cleaning needed - just replace the film!

- Free-standing, adjustable room divider provides the flexibility to isolate and protect people in any environment or application – simply adjust the frame height and width, then cut and attach the film to fit your needs
- Costs less than plexiglass or acrylic barriers and is easier and faster to install!
- No need to repeatedly clean like rigid plexiglass panels! Simply unroll and replace the clear plastic sheeting with new material as needed in a matter of minutes (used sheeting can be discarded or recycled)
- Choose from two film sizes: 3'H x 100'L roll is ideal for pass-through setups at desks and counters to allow brief interactions or exchanges with people on the other side; 4'H x 100'L roll is best for standing applications or wherever you need more coverage
- Highly portable, easy to tote partition is the fastest way to divide queues of people or separate workspaces for social distancing; disassembles and fits in small tote bag (included) for carrying when not in use
- Helps to establish directional lines and queues at entrances to facilities or buildings where health screening and temperature checks are conducted prior to entry
- Ideal for use in restaurants, retail stores, gyms, salons, and anywhere partitioning and dividing is needed; ideal for separating workers in assembly or production lines
- Durable, lightweight aluminum barrier frame is quick and easy to assemble; frame adjusts from 3.5' to 7.5' H and 6' to 9.75' W
- Clear, plastic sheeting can be cut to desired length and clamped onto the frame using included clips (10 clips included)
- Helps meet workplace control measures

outlined by OSHA's Guidance on Preparing Workplaces for COVID-19
