

PIG® UV Activated Repair Patch

PTY427 For Metals, Masonry, Glass & Wood,9" W x 12" L,1 each

Quickly repair almost any surface with this UV-activated patch that's easy to apply and holds tough.

- Durable, reinforced polyester/plastic patch starts flexible and hardens once activated
- Easy to apply; just cut, peel and stick to any hard, non-polypropylene surface that's clean and dry
- Fully cures in as few as 5 minutes in direct sunlight or about 15 minutes under UV light (UV flashlight sold separately); begins hardening and holding within first few minutes
- Once fully cured, can drill, tap, sand and paint for a professional look
- Won't shrink or expand during or after curing
- Great for outdoor use; waterproof, weather-resistant and temperature-resistant from -40°F to 392°F
- FDA Approved; non-toxic, and adhesive won't harm skin
