

PIG® High Flow Roof Leak Diverter Tarp

TLS676 11' W x 11' L, Leak Diverter Tarp;
Hose, Install With Hanging Straps

High flow design catches and diverts up to 10 gallons per minute to prevent high volume ceiling leaks from becoming a big problem.

- Easy and quick way to prevent damage to your facility caused by roof or ceiling leaks
- 3" diameter flat hose drains up to 10 gallons of liquid per minute
- Heavy-duty vinyl-coated tarp resists punctures, UV and mildew and lasts multiple deployments
- Pinched corners create a funnel to channel liquids to a drain or collection container without overflowing or sagging; engineered with leak-proof seams and connections
- Brass grommets resist tearing and make installation easy; multiple hanging points add stability and preserve funnel shape
- Extra-large drain opening and debris cage prevents clogs from crumbled ceiling tiles, drywall and roofing material
- Cut drain hose for a custom fit; insert 90-degree elbow between hose sections to prevent kinking (hose and elbow fitting included)
- Ideal for washdowns or after heavy rains
- Collection container and hanging straps sold separately
