

PIG® Super Water-Absorbing Sock

WTR020 One-Time Use for Large Volumes of Water, Each absorbs up to 1.75 gal., Includes (20) 3" x 48" socks

Super absorbent sock absorbs and locks in large volumes of water-based leaks and spills quickly.

- Pulls in large volumes of water on contact to confine/contain pools and puddles and prevent damage and slip and fall injuries; fast-wicking sock saves time on cleanup
- Super absorbent polymer (SAP) filler and spunbound sock skin lock water and water-based liquids inside without leakage
- Sock retains and absorbs 15 times its weight in liquid so it can act as a weighted berm when saturated
- Great for indoor applications where water needs to be quickly absorbed or diverted; soaks up water from windows, cracked foundations and seepage under doors
- Great for surrounding machines during system breakdowns; use around pipes, broken hoses, leaking hot water tanks or malfunctioning equipment
- Soaks up excess washdown water in food service and food processing areas
- Ideal for use with water-based, non-corrosive liquids. Not for use with acids, bases or corrosive fluids
